

J P.

Carmichael, CA

Awful rude disrespectful elderly lady at the front desk- I would NEVER treat a potential customer as she did. Don't waste your time here-

Debi B.

Pine Grove, CA

This was quite possibly the worst experience I have ever had by any care provider. This place is filthy. The staff argues and will lean on you to get there balance. They use crystals and stick their fingers in your mouth. Use the tried and true scam of pushing on your arm to show your imbalances and then magically fixing them. Then they put me on the rack to stretch my back. After this treatment I could barely walk and was sobbing in pain and then they tried to over-charge me and up sell me the little toxin boxes. Trying to upsell a woman in tears is about as low as one can go. Wait selling thousands of dollars in gadgets to people with cancer promising a cure is lower.

Carmichael, CA

The staff was extremely rude upon arrival and when I left and it was just horrible overall. On top of everything I was charged an exuberant amount of money for the poor services. Terrible experience. Am in more pain today than prior to so-called treatments. The chiropractor was overly rough, tried to convince me to purchase expensive equipment and I was in pain for weeks.

S. W.

Salem, OR

Very unconventional treatment, but I have been pain free over a year.

I gave him only 4 stars because his sisters at the front desk are still really "not with it", and it takes forever to get out of there. Everyone in the office is in their 80's and a little foggy in the head.
